

TECHNICAL REQUIREMENTS - FORADADA 2023

Set up time: 3h Set down time: 1h

Minimum stage space: 5x5m. Height 3m. Placed on the floor (NO stage or platforms).

Audience space: +3m minimum from the stage space.

A wall is needed behind. Ideally also an L-shaped wall to the side.

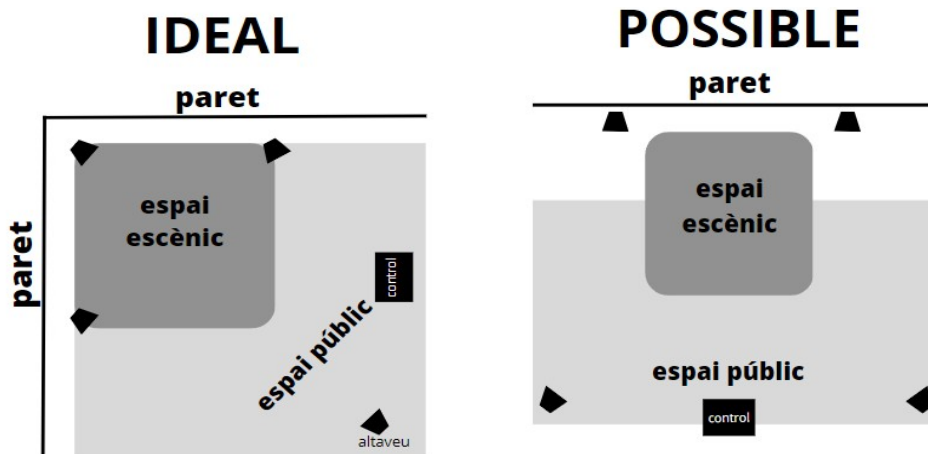

Flat floor. Optional linoleum

Puzzle tatami + 20 cushions (provided by the company).

Location of the audience:

A) Ideal: On two sides of the stage in L-shape, seated on the floor, on chairs and standing or in stands.

B) Possible: In a semicircle, seated on the floor, on chairs and standing or in a grandstand.

Possibility of performing in unconventional spaces, indoors and outdoors.

Audience from 10 years old

Recommended capacity: 300 people maximum.

SOUND SPACE

The proposal is a Mac set up with output through 4 loudspeakers. The whole sound space is mixed and triggered live with Ableton live. The microphones provided by the company will be processed live from the control area. A quad system needs to be installed, therefore there are 4 individual outputs.

Requirement list:

- 2 x 500W self-powered loudspeakers with tripod
- 2 self-powered 250W speakers with tripod
- Wiring (2 x 10m jack, and 1x 10m canon for the microphones)
- 8-channel sound board minimum and 2 auxiliary minimum.

- 1 table 180x70cm and 2 chairs.

The company provides:

- Mac computer
- RME 400 Firefire sound card
- 3 contact microphones
- 1 microphone
