

Cia El Cruce
Punto y Coma

Sinopsis

Punto y Coma are not.

Their world does not exist.

If you can see them you are a privileged person.

In their fantastic world the objects are alive, movement talks and the words fly away. They coexist into a forgotten space lost in time, in a strange place where images dance and fragility tremble... It is a unique space, a book's garden inhabited by strange beings and reinvented objects, a magical and surprising place, disturbingly familiar.

They are complicatedly simple, emotionally logical and nostalgically funny. In their poetic world things are not what they seem, Punto y Coma either. Their reality may seem confuse, their actions reckless, their appearance intimidating... but don't be afraid they are completely harmless. This eccentric couple makes the absurdity vital and transforms the mundane situations into an experience of extraordinary dimensions.

Punto y Coma is a contemporary scenic proposal that explores the boundaries of Circus-Theatre. Taking its inspiration from Expressionism and theater of the absurd, explores the concepts of "culture" and "knowledge" exploring the poetic and expressive possibilities of contemporary circus and physical theater.

El Cruce ,with Punto y Coma develops an original language to transmit ideas and emotions in a funny, risky and terrifyingly absurd way, sharing an unique live experience with the audience.
