

ATEMPO

Technical sheet:

- Duration: 40 minutes
- Minimum stage space: 6 m wide x 6 m deep x 6 m high
- Audience distribution: Semicircular or frontal
- Assembly: 30 minutes
- Disassembly: 15 minutes
- Sound: Sound equipment is required to shoot tracks from the phone. Preferably with even coverage throughout the audience area, with a range of 20/16,000hz of flat response, +/-3db, without distortion and nominal level. The company can also use its own sound equipment (battery-powered without the need for electricity), suitable for an audience of no more than 250 people.
- Lights: If necessary, the lighting system is designed according to the possibilities of the site.
